# BUILT FOR A GREENER FUTURE.

Choosing a property within a new PFI estate means committing to sustainability from the ground up. Each development targets a 5 Star Green Star Design & As Built rating - delivering energy efficiency, reduced operational costs, and a healthier environment for tenants and their teams.

## WHAT GREEN STAR MEANS

- New Zealand's leading sustainability rating system for buildings
- Measures performance across energy, water, materials and indoor environment quality
- Creates healthier, more efficient spaces for people and businesses

## WHY WE DO IT

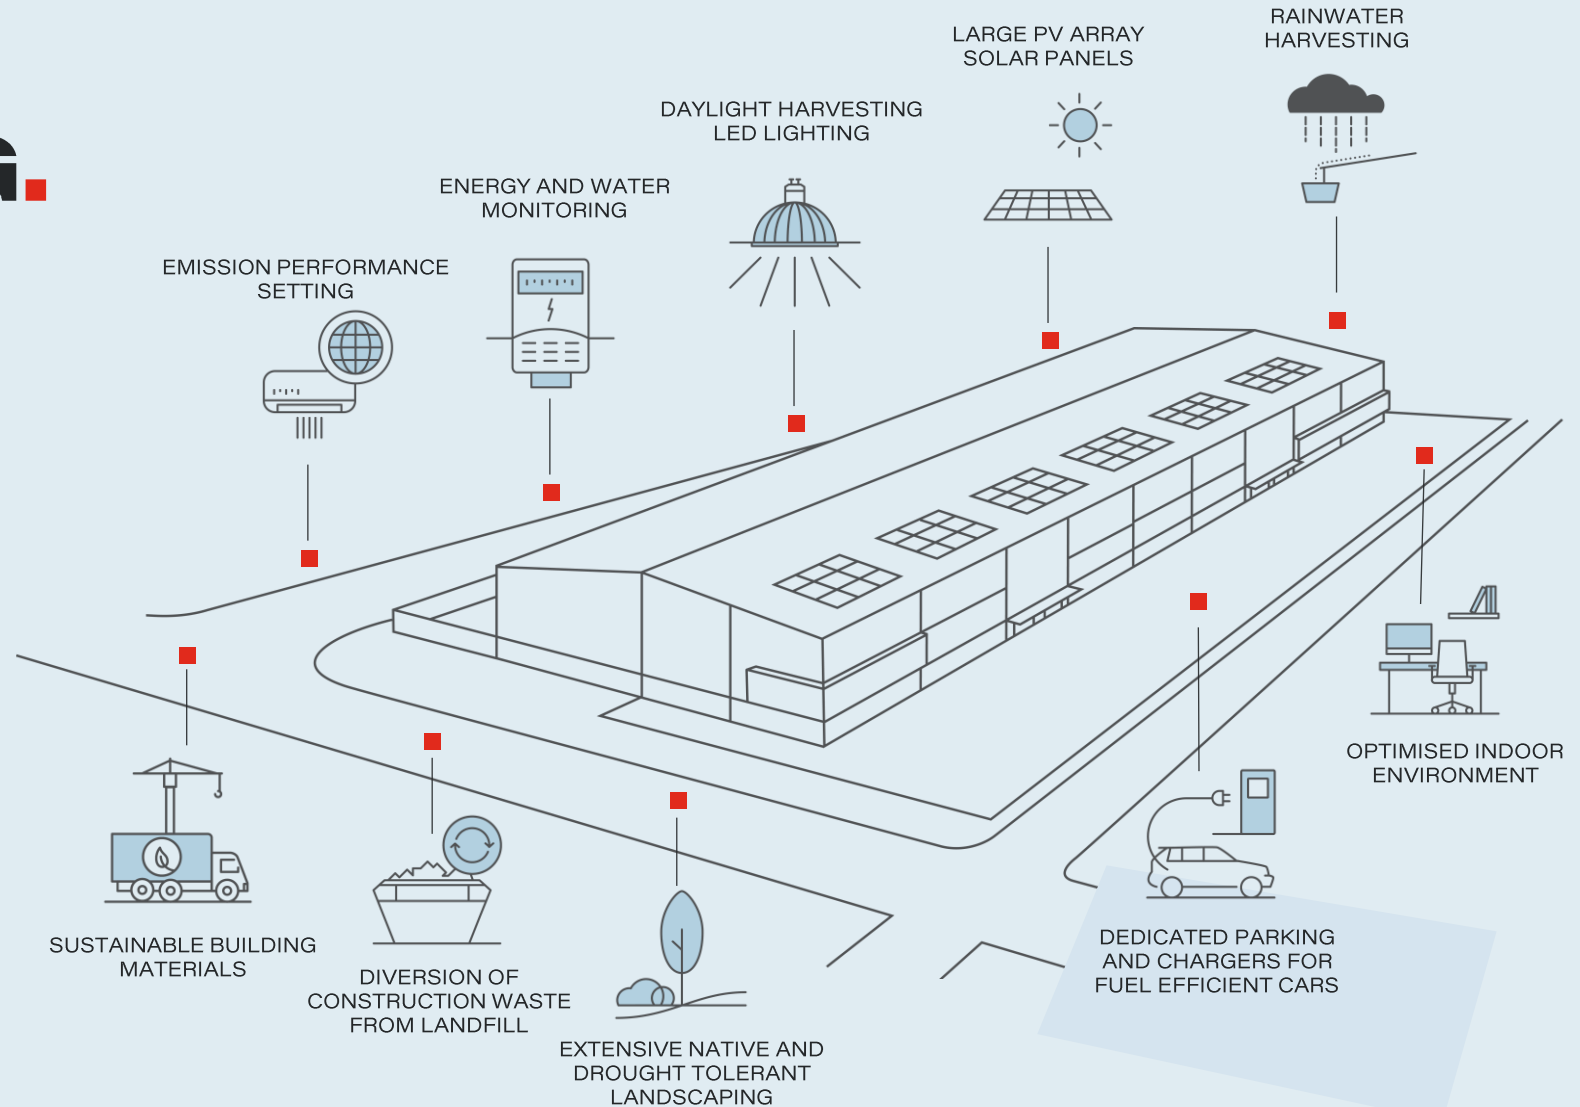

- Lower operational costs for tenants through energy and water efficiency
- Healthier workplaces with improved air quality and natural light
- Reduced environmental impact from construction and operation

# DESIGNED FOR PERFORMANCE AND WELLBEING.

Every significant new PFI development integrates features that support efficiency, comfort, and environmental responsibility.

At Springs Road Estate, this starts with sustainable construction choices such as low-GWP concrete and a target of at least 70% waste diversion from landfill.

The design includes energy and water efficiency measures and careful attention to indoor environment quality, with fresh air rates 100% above NZBC requirements, low ambient noise, good access to daylight and views, and LED lighting for uniform, flicker-free illumination.
