# DESIGNED FOR PERFORMANCE AND WELLBEING.

Every significant new PFI development integrates features that support efficiency, comfort, and environmental responsibility.

At Totara Creek Estate, this starts with sustainable construction choices such as low-GWP concrete and a target of at least 70% waste diversion from landfill.

The design includes energy and water efficiency measures and careful attention to indoor environment quality, with fresh air rates 100% above NZBC requirements, low ambient noise, good access to daylight and views, and LED lighting for uniform, flicker-free illumination.
